@KatTitterton
ORCID 0009-0008-3579-1793

Analytical researcher in high-content imaging. Develops and scales assays until the signal is clean, extracts what the images hold, then makes the case in the room with numbers and a story. Work across academia (MGH, MIT), big pharma (AbbVie) and ML-first biotech (Insitro, Axiom Bio) has given a wide view of how science gets done, and of the biases that shape it.

Self-taught coder: took graduate night courses in Python (2019) and computer vision (2020, during COVID), then spent nights and weekends automating data analysis in Python and R, before AI could write code. Has kept automating the bench since, from liquid-handler scheduling and R dose-response pipelines to PyTorch segmentation, and now builds with people and AI agents, for people.

Prefers the work to the credit: co-author of eight peer-reviewed papers, including two in *Nature Communications*, contributing the assays, imaging and analysis behind them.

SELECTED CONTRIBUTIONS

- Achieved ~10× more sensitive bioactivity detection than standard toxicity assays with two new methods.
- Delivered one of the world's largest Cell Painting datasets (100,000+ compounds, 10M+ images) for *in silico* toxicology.
- Reached 0.92 AUC (77% sensitivity, 90% specificity) with an interpretable *in silico* liver-injury (DILI) risk model, matching or exceeding standard *in vitro* assays (SOT 2025).
- Showed, with collaborators, that widely used small-molecule bioactivity benchmarks are largely predicted by counting cells (*Nat Commun* 2026 [4]).
- Enabled nanoscale imaging of 30+ proteins in 16× expanded brain tissue (*Nat Commun* 2024 [6]).

EXPERIENCE

Axiom Bio Founding Member of the Technical Staff — San Francisco, CA 2023–2026

- Oversaw assay development, QC and data generation for one of the world's largest Cell Painting datasets (100,000+ compounds, 10M+ images, nearly every commercially available bioactive), the training data for models that predict bioactivity and help medicinal chemists design better drugs; led feature engineering on it.
- Invented two low-noise algorithms that detect subtle compound-induced morphology change; they flag small-molecule effects at ~10× lower concentrations than conventional cytotoxicity assays (LDH, MT-Glo, cell count), which made them the most important features in the DILI model, and caught batch-to-batch drift.
- Led image labeling specs, QC and PyTorch U-Net segmentation of 100,000+ compound Cell Painting images; models in production for more than a year after benchmarking Segment Anything (SAM).
- Partnered on an interpretable *in silico* DILI clinical-risk model reaching 0.92 AUC.
- Shaped scientific product direction as a founding technical hire.

  Nat Commun 2026 [4] Cell Syst 2026 [3] bioRxiv 2026 [P1]

Insitro Associate Scientist III, Arrayed Screening — South San Francisco, CA 2022–2023

- Onboarded tuberous sclerosis complex and ALS small-molecule screens, from assay development to automated 384-well feeding, staining and imaging (BioTek, HighRes Biosolutions).
- Trained two screen operators.
- Automated QC and analysis of hundreds of 384-well plates with Python/R scripts.

- Built a digital phase-contrast imaging modality, segmentation and Python analysis pipeline to track neuron growth dynamics and drive label-free phenotypic discovery.

MIT Technical Associate II, Synthetic Neurobiology Group Cambridge, MA 2021–2022

- Imaged 30+ proteins at nanoscale by optimizing multiplexed expansion revealing (mExR) for 7+ rounds of immunostaining on 16× expanded brain tissue.
- Ran and optimized the Boyden Lab's shared ImageJ/Fiji and MATLAB image-analysis pipelines for the published method.

  Nat Commun 2024 [6]

AbbVie Associate Scientist II, Foundational Neuroscience Center Cambridge, MA 2018–2021

- Cultured primary neurons each week for 3+ years, supporting 10+ tau team scientists.
- Scaled the culture from manual to automated by onboarding Integra liquid handlers.
- Established tau-aggregation high-content screens in primary murine and human iPSC neurons (Revvity Opera, Harmony), from assay development to R dose-response pipelines that ranked tau immunotherapy candidates.
- Screened anti-tau antibodies by high-content analysis in primary neurons (SBI2 2019).
- Tested next-gen microfluidic devices, keeping primary murine neurons alive 3+ months to model intercellular tau propagation as an advanced *in vitro* screen (SfN 2021).

  Mol Neurodegener Adv 2026 [1] iScience 2026 [2] J Biol Chem 2025 [5] iScience 2022 [7]

Massachusetts General Hospital Research Technician I Boston, MA 2017–2018

- Recorded voltage-clamp currents from GABA-A receptors expressed in *Xenopus* oocytes to study how general anesthetics act.

  Eur J Med Chem 2019 [8]

EDUCATION

Colgate University B.A. Cellular Neuroscience, *cum laude* Hamilton, NY 2013–2017

Minor in Mathematical Systems Biology. Co-captain, Division I Track & Field.

Harvard Extension School Graduate coursework Cambridge, MA 2019–2020

- Introduction to Programming in Python with Applications in Life Science (CSCI E-7, 2019), a CS50-style course for life scientists, taken while working full-time on AbbVie tuition support.
- Image Processing and Computer Vision (CSCI S-25, 2020), taught in Python: color representation, segmentation, feature extraction and early deep models including U-Nets.

Earlier research presentations

- Investigating RNAi as a potential therapeutic for Huntington's disease in a transgenic mHTT145Q zebra finch (*Taeniopygia guttata*) model. Colgate University Neuroscience Thesis Poster Presentations, 2017.
- Atopy and helminth infection in Ethiopian schoolchildren. Colgate Summer Research Poster Symposium, 2016.

- PDE2 regulation of β-arrestin signaling. Systems Biology Center New York (SBCNY) Summer Trainee Poster Symposium, Icahn School of Medicine at Mount Sinai, 2015.

PROJECTS

Datum Line AI × bio startup: one shared map of every lab's controls, to tell if cells look normal 2026
What would the right startup be for my own strengths, work and the state of the field? A venture pitch built on one question, "do my cells look normal?" Every result is a difference from a control, and nobody checks the control against other labs. On 93,228 public control wells from 1,872 plates in 11 labs, a classifier names the lab from controls alone at 99.9% balanced accuracy, and a lab's drift predicts disagreement on known answers. code and evidence

Every line is a loop A periodic table for biology 2026
Does biology have a periodic table? Chemistry has one because electrons come in whole numbers; a cell's circuits have whole numbers too: loops, brakes and running totals. An interactive essay that reads 613 published BioModels and counts them into a table, where every switch has a self-feeding loop and every clock a brake. Live figures of the lac switch, a circadian clock and chemotaxis. code and analysis

Overdose Watch Public tracker kept current by a weekly agent 2026
Official 12-month overdose death counts (CDC, state and county health departments, the SF medical examiner) and primary-sourced incident reports on one map and timeline. A scheduled Claude Code agent pulls new data, finds new reports, validates them and publishes every Monday. code and data

Vanitas / Veritas AI slop as vanitas 2026
What does a model drinking its own output look like? An 8.5-minute 4K loop melting eight vanitas portraits, built with open-source diffusion (Stable Diffusion 1.5, LCM-LoRA, Real-ESRGAN) on a laptop; the key finding was that going slow, not more diffusion, made it beautiful. Plus an interactive web piece. pipeline and docs

treble A one-hour DJ set coded with AI 2026
Can taste be taught to a process? A one-hour set built from beat-aligned transitions and a listening studio, refined by ear over 44 versions; building it into a general tool. Hear p[i]lot (picked by hand), p[ai]lot (full algorithm) and b[u][r]ning. Code available on request.

claude-code-learns Graph-engineered agent harness: corrections become skills, auto-checked 2026

EARLIER PROJECTS & CREATIVE WORK

Bare Metal Solo generative-art exhibit, Human Tech Week SF; post-hoc analysis 2025

Vivarium 2.0 Automated poison-dart-frog habitat with misting and live video 2024

OpenTronsformers LLM copilot for the OT-2 lab robot; 2nd-place team, BioHack NYC 2023

HONORS & AWARDS

2nd place, BioHack NYC OpenTronsformers, LLM-driven lab-robot automation 2023

Dorothy-Waltham Award for Athletic Leadership Colgate University 2017

cum laude Colgate University 2017

SKILLS

Code & agents: Claude Code (skills, hooks, scheduled agents); agent harnesses and graph engineering; LLM evals; Cursor; Git and GitHub; HTML, CSS and SVG for interactive pages

ML & data: PyTorch; U-Net segmentation (SAM evaluated); labeling specs and dataset QC; feature engineering; image embeddings (visualization, clustering, feature derivation, normalization); Python (NumPy, SciPy, scikit-learn, pandas, matplotlib, seaborn, Jupyter); R (tidyverse, ggplot2, drc, platetools); dose-response curve fitting (Prism, R, Python); univariate and multivariate statistics; design of experiments; agentic coding (Claude Code, Cursor)

Imaging & signal: high-content and confocal microscopy (Opera Phenix, Operetta, Harmony); expansion microscopy; label-free phase-contrast timecourse imaging; image formation and instrument artifacts; voltage-clamp electrophysiology; ImageJ/Fiji macros; MATLAB

Story & design: data visualization and figure generation; pitch-deck and web design; generative art (Midjourney, Stable Diffusion); scientific storytelling for talks and posters

Lab & automation: primary murine and human iPSC neuron culture; microfluidic culture models; immunocytochemistry and immunohistochemistry; assay development; high-throughput, high-content screening; stereotaxic surgery and tissue microdissection; liquid handlers and schedulers (OpenTrons, Integra, BioTek, Labcyte Echo, HighRes Biosolutions, Green Button Go); Benchling

MEMBERSHIPS & CERTIFICATIONS

Memberships: Society of Toxicology, Society for Neuroscience, Society of Biomolecular Imaging and Informatics

Certifications: freediving, FII Level 1 (2019) and Molchanov Level 2 (2025); SII Shark Ecology Specialty (2020)
