Katherine L. Titterton Curriculum Vitae

Scientist-engineer and technical storyteller in neuroscience, imaging and AI

Analytical researcher in high-content imaging. Develops and scales assays until the signal is clean, then extracts what the images hold: from *in vitro* neurodegeneration models to AI-ready datasets. Learned to code at night before AI could; now builds with people and AI agents, for people.

EXPERIENCE

Axiom Bio Founding Member of the Technical Staff San Francisco, CA 2023–2026

- Oversaw generation and QC of 10M+ Cell Painting images of 100,000+ compounds (nearly every commercial bioactive), the training data for models that predict bioactivity and help medicinal chemists design better drugs.
- Invented two low-noise algorithms for morphology change, ~10× more sensitive than conventional cytotoxicity assays, which made them top features of a 0.92 AUC liver-injury (DILI) model; they also caught batch drift.
- Led image labeling specs, QC and PyTorch U-Net segmentation of the dataset, benchmarked against Segment Anything (SAM); models in production for 1+ year.

Nat Commun 2026 [4] Cell Syst 2026 [3] bioRxiv 2026 [P1]

Insitro Associate Scientist III, Arrayed Screening South San Francisco, CA 2022–2023

- Adapted and ran high-content phenotypic screens for tuberous sclerosis complex and ALS on automated platforms (BioTek, HighRes Biosolutions), from assay development to 384-well feeding, staining and imaging.
- Automated QC and analysis of hundreds of 384-well plates with self-taught Python and R.
- Built a digital phase-contrast imaging modality and segmentation for label-free tracking of neuron growth.
- Trained two screen operators.

MIT Technical Associate II, Synthetic Neurobiology Group Cambridge, MA 2021–2022

- Optimized multiplexed expansion revealing (mExR) for 7+ immunostaining rounds: 30+ proteins at nanoscale in 16× expanded brain tissue.
- Ran and optimized the Boyden Lab's shared ImageJ/Fiji and MATLAB image-analysis pipelines for the published method.

Nat Commun 2024 [6]

AbbVie Associate Scientist II, Foundational Neuroscience Center Cambridge, MA 2018–2021

- Cultured primary neurons weekly for 3+ years, supporting 10+ tau team scientists; scaled the culture from manual to automated by onboarding Integra liquid handlers.
- Developed high-content tau aggregation assays in primary murine and human iPSC neurons (Revvity Opera, Harmony), with R dose-response pipelines that ranked tau immunotherapy candidates.
- Screened anti-tau antibodies by high-content analysis in primary neurons (SBI2 2019).
- Tested next-gen microfluidic devices, keeping primary murine neurons alive 3+ months to model tau spread (SfN 2021).

Mol Neurodegener Adv 2026 [1] iScience 2026 [2] J Biol Chem 2025 [5] iScience 2022 [7]

Massachusetts General Hospital Research Technician I Boston, MA 2017–2018

- Recorded voltage-clamp currents from GABA-A receptors in *Xenopus* oocytes to study how anesthetics act.

Eur J Med Chem 2019 [8]

EDUCATION

Colgate University B.A. Cellular Neuroscience, *cum laude* Hamilton, NY 2013–2017
Minor in Mathematical Systems Biology. Co-captain, Division I Track & Field.

Harvard Extension School Graduate coursework Cambridge, MA 2019–2020

- Introduction to Programming in Python with Applications in Life Science (CSCI E-7, 2019), taken while working full-time at AbbVie.
- Image Processing and Computer Vision (CSCI S-25, 2020): segmentation, feature extraction and early deep models including U-Nets.

TALKS & POSTERS

Titterton K. Using AI to Combine Exposure, Metabolism, and Liver Function to Model DILI in Modern Molecules. Talk, *American College of Toxicology (ACT) Annual Meeting*, Phoenix, AZ, 2025. replay

Titterton K, Boiko D, Cabrera ÁA, Bäuerle A, Tyagi A, Saneinejad S, Beatson A, White B. Accurate and interpretable *in silico* clinical risk assessment for drug-induced liver injury (DILI) from molecular structure. Poster, *Society of Toxicology (SOT) Annual Meeting*, 2025.

Titterton K, et al. Development of a tau propagation neuronal microfluidic cell culture model for assessing inhibitors of tau propagation. Poster, *Society for Neuroscience (SfN) Global Connectome*, 2021.

Titterton K, et al. High content analysis of tau aggregation in primary neurons: screening anti-tau antibodies and modeling tauopathy progression *in vitro*. Poster, *SBI2 High Content Meeting*, Harvard Medical School, 2019.

Investigating RNAi as a potential therapeutic for Huntington's disease in a transgenic mHTT145Q zebra finch (*Taeniopygia guttata*) model. Poster, *Colgate University Neuroscience Thesis Presentations*, 2017.

Atopy and helminth infection in Ethiopian schoolchildren. Poster, *Colgate Summer Research Symposium*, 2016.

PDE2 regulation of β-arrestin signaling. Poster, *Systems Biology Center New York Summer Trainee Symposium*, Icahn School of Medicine at Mount Sinai, 2015.

PROJECTS

Datum Line AI × bio startup: one map of every lab's controls, to tell if cells look normal code 2026
On 93,228 public control wells from 1,872 plates in 11 labs, a classifier names the lab from controls alone at 99.9% balanced accuracy, and a lab's drift predicts disagreement on known answers.

Every line is a loop A periodic table for biology code 2026
Interactive essay that reads 613 published BioModels and counts their circuits into a table: every switch has a self-feeding loop and every clock a brake. Live figures of the lac switch, a circadian clock and chemotaxis.

Overdose Watch Public tracker kept current by a weekly agent code 2026
Official 12-month overdose death counts (CDC, state and county health departments, the SF medical examiner) and primary-sourced incident reports on one map and timeline, refreshed every Monday by a scheduled Claude Code agent.

Vanitas / Veritas AI slop as vanitas code 2026
An 8.5-minute 4K loop melting eight vanitas portraits with open-source diffusion (Stable Diffusion 1.5, LCM-LoRA, Real-ESRGAN) on a laptop, with an interactive web piece.

treble A one-hour DJ set coded with AI code on request 2026
Beat-aligned transitions and a listening studio, refined by ear over 44 versions and growing into a general tool. Hear p[i]lot (picked by hand), p[ai]lot (full algorithm) and b[u][r]ning.

claude-code-learns Graph-engineered agent harness: corrections become skills code 2026
Each correction becomes a skill; automated checks confirm every skill parses and loads when it should.

Bare Metal Solo generative-art exhibit, Human Tech Week SF, with a post-hoc analysis 2025

Vivarium 2.0 Automated poison-dart-frog habitat with misting and live video 2024

OpenTronsformers LLM copilot for the OT-2 lab robot; 2nd-place team, BioHack NYC 2023

HONORS & AWARDS

2nd place, BioHack NYC OpenTronsformers, LLM-driven lab-robot automation 2023

Dorothy-Waltham Award for Athletic Leadership Colgate University 2017

SKILLS

Code & agents: Python (NumPy, SciPy, scikit-learn, pandas, matplotlib, seaborn, Jupyter); R (tidyverse, ggplot2, drc, platetools); Git and GitHub; Claude Code (skills, hooks, scheduled agents); agent harnesses and graph engineering; LLM evals; Cursor; HTML, CSS and SVG for interactive pages

ML & data: PyTorch; U-Net segmentation (Cellpose and SAM evaluated); labeling specs and dataset QC; feature engineering; image embeddings (visualization, clustering, normalization); dose-response curve fitting (Prism, R, Python); univariate and multivariate statistics; design of experiments

Imaging & signal: high-content and confocal microscopy (Opera Phenix, Operetta, Harmony); expansion microscopy; label-free phase-contrast timecourse imaging; image formation and instrument artifacts; ImageJ/Fiji macros; MATLAB; voltage-clamp electrophysiology

Lab & automation: primary murine and human iPSC neuron culture; microfluidic culture models; immunocytochemistry (ICC) and immunohistochemistry (IHC); assay development; high-throughput, high-content screening; stereotaxic surgery and tissue microdissection; liquid handlers and schedulers (Opentrons, Integra, BioTek, Labcyte Echo, HighRes Biosolutions, Green Button Go); Benchling

Story & design: data visualization and figure design; pitch-deck and web design; generative art (Midjourney, Stable Diffusion); scientific storytelling for talks and posters
