Neuroscientist-engineer at the seam of imaging, signal extraction, and machine learning. Eight years across academia (MGH, MIT), big pharma (AbbVie) and ML-first biotech (Insitro, Axiom Bio) have given a wide view of how science gets done, and of the biases that shape it. Self-taught coder: took Python and computer-vision night courses during COVID and spent nights and weekends automating data analysis in Python and R, before AI could write code. Has kept automating the bench since, from liquid-handler scheduling and R dose-response pipelines to PyTorch segmentation, and now builds with agentic coding. Values superb technical execution over author order: co-author of eight peer-reviewed papers, including two in *Nature Communications*, contributing the assays, imaging and analysis behind them.

SELECTED CONTRIBUTIONS

[n] = publication number below

- Achieved ~10× more sensitive bioactivity detection than conventional toxicity assays (LDH, MT-Glo, cell count) with two novel image-based methods.
- Delivered two of the world's largest Cell Painting datasets (100,000+ compounds), foundational training data for in silico toxicology models.
- Reached 0.92 AUC (77% sensitivity, 90% specificity) with an interpretable in silico liver-injury (DILI) risk model, matching or exceeding standard in vitro assays (SOT 2025).
- Showed, with collaborators, that widely used small-molecule bioactivity benchmarks are largely predicted by counting cells (*Nat Commun* 2026 [4]).
- Enabled nanoscale imaging of 30+ proteins in 16× expanded brain tissue (*Nat Commun* 2024 [6]).

EXPERIENCE

Axiom Bio · Founding Member of the Technical Staff — San Francisco, CA — 2023–present

- Led image labeling and PyTorch U-Net segmentation of 100,000+ compound Cell Painting images; models in production for more than a year after benchmarking Segment Anything (SAM).
- Invented two image-based bioactivity-detection methods that flag small-molecule effects at ~10× lower concentrations than conventional toxicity assays.
- Oversaw assay development, QC and data generation for two of the world's largest Cell Painting datasets.
- Partnered on an interpretable in silico DILI clinical-risk model reaching 0.92 AUC.
- Shaped scientific product direction as a founding technical hire.

  Nat Commun 2026 [4] · Cell Syst 2026 [3]

Insitro · Associate Scientist III, Arrayed Screening — South San Francisco, CA — 2022–2023

- Onboarded tuberous sclerosis complex and ALS small-molecule screens, from assay development to automated 384-well feeding, staining and imaging (BioTek, HighRes Biosolutions).
- Trained two screen operators; automated analysis of hundreds of 384-well plates in Python and R.
- Developed a label-free digital phase-contrast timecourse imaging method and Python analysis suite to track live neuron growth.

MIT · Technical Associate II, Synthetic Neurobiology Group (Boyden Lab) — Cambridge, MA — 2021–2022

- Imaged 30+ proteins at nanoscale by optimizing multiplexed expansion revealing (mExR) for 7+ rounds of immunostaining on 16× expanded brain tissue.
- Built the ImageJ/Fiji and MATLAB image-analysis pipelines behind the published method.

  Nat Commun 2024 [6]

AbbVie · Associate Scientist II, Foundational Neuroscience Center — Cambridge, MA — 2018–2021

- Established tau-aggregation high-content screens in primary murine and human iPSC neurons (Revvity Opera, Harmony), from assay development to R dose-response pipelines that ranked lead candidates.

- Screened anti-tau antibodies by high-content analysis in primary neurons (SBI2 2019).
- Designed microfluidic neuron cultures that model tau spread between cells, for testing propagation inhibitors (SfN 2021).

  Mol Neurodegener Adv 2026 [1] · iScience 2026 [2] · J Biol Chem 2025 [5] · iScience 2022 [7]

Massachusetts General Hospital · Research Technician I — Boston, MA — 2017–2018

- Recorded voltage-clamp currents from GABA-A receptors expressed in *Xenopus* oocytes to study how general anesthetics act.

  Eur J Med Chem 2019 [8]

EDUCATION

Colgate University · B.A. Cellular Neuroscience, *cum laude* — Hamilton, NY — 2013–2017
Minor in Mathematical Systems Biology. Co-captain, Division I Track & Field.

Harvard Extension School · Graduate coursework — Cambridge, MA — 2017–2020
Introduction to Programming (Python); Image Processing & Computer Vision (Python); Social Medicine. Completed while employed full-time; the Python and computer-vision courses during 2020 on AbbVie tuition support.

PEER-REVIEWED PUBLICATIONS

[3] **Titterton K**, et al. High content analysis (HCA) of tau aggregation in primary neurons: screening anti-tau antibodies and modeling tauopathy progression in vitro. *SBI2 High Content Meeting*, September 2019, Harvard Medical School, Boston, MA. poster

Earlier research presentations

- Investigating RNAi as a potential therapeutic for Huntington's disease in a transgenic mHTT145Q zebra finch (*Taeniopygia guttata*) model. Colgate University Neuroscience Thesis Poster Presentations, 2017.
- Atopy and helminth infection in Ethiopian schoolchildren. Colgate Summer Research Poster Symposium, 2016.
- PDE2 regulation of β-arrestin signaling. Systems Biology Center New York (SBCNY) Summer Trainee Poster Symposium, Icahn School of Medicine at Mount Sinai, 2015.

PROJECTS & CREATIVE WORK

Bare Metal · Solo generative-art exhibit, Human Tech Week SF; post-hoc analysis 2025

Vivarium 2.0 · Automated poison-dart-frog habitat: misting control, motion-triggered video 2024

OpenTronsformers · LLM copilot for the OT-2 lab robot; 2nd place, BioHack NYC 2023

Open source · Diffusion video pipeline and an agent-skills library, github.com/kat-titter 2026

HONORS & AWARDS

2nd place, BioHack NYC · OpenTronsformers, LLM-driven lab-robot automation 2023

Dorothy-Waltham Award for Athletic Leadership · Colgate University 2017

cum laude · Colgate University 2017

SKILLS

ML & data: PyTorch; U-Net segmentation (SAM evaluated); image embeddings (visualization, clustering, feature derivation, normalization); Python (NumPy, SciPy, scikit-learn, pandas, matplotlib, seaborn, Jupyter); R (tidyverse, ggplot2, drc, platetools); dose-response curve fitting (Prism, R, Python); univariate and multivariate statistics; design of experiments; agentic coding (Claude Code, Cursor)

Imaging & signal: high-content and confocal microscopy (Opera Phenix, Operetta, Harmony); expansion microscopy; phase-contrast timecourse imaging; voltage-clamp electrophysiology; ImageJ/Fiji macros; MATLAB

Lab & automation: primary murine and human iPSC neuron culture; microfluidic culture models; immunocytochemistry and immunohistochemistry; assay development; high-throughput, high-content screening; stereotaxic surgery and tissue microdissection; liquid handlers and schedulers (OpenTrons, Integra, BioTek, Labcyte Echo, HighRes Biosolutions, Green Button Go); Benchling

MEMBERSHIPS & CERTIFICATIONS

Memberships: Society of Toxicology (SOT) · Society for Neuroscience (SfN) · Society of Biomolecular Imaging and Informatics (SBI2)

Certifications: FII Level 1 Freediving (Oct 2019) · Molchanov Level 2 Freediving (Oct 2025) · SII Shark Ecology Specialty (Apr 2020)
